# COMING TO A SPEED SHOP NEAR YOU

THE TOP NEW PRODUCTS WE SAW AT THE 2012 SEMA SHOW.

**The SEMA show is** the premier automotive specialty products trade event in the world. It attracts the industry's hottest products to one place, the Las Vegas Convention Center. This freight train of a show keeps chugging down the tracks, bringing all the newest parts and products for the automotive aftermarket. While the show is not open to the general public, it is open to industry and media people, and is now the largest trade show in the United States. Since most of you can't take the time to trek all the way to Las Vegas and wander the miles of booths, we do it for you. We take notes and talk to the company pitchmen all in an attempt to find the hidden treasures buried in the over 2,000 new products on display. Instead of taking any more time please sit back and enjoy the best products we found at the 2012 SEMA show. *SEP*

### '67-'88 Camaro Stealth Fuel Tank

Engines swaps

and aftermarket EFI conversions are becoming incredibly popular, and thanks to Aeromotive's new Stealth tank, the task has gotten simpler. The Stealth tanks are stock-appearing and come complete with universal 0-90 Ohm fuel sending unit, 340 LPH at 40 psi Stealth Fuel Pump, pre-pump filter, a billet aluminum, and black anodized hanger assembly. They come with all the necessary ports and returns needed to plumb the system. All this is preassembled, powdercoated, and flow and pressure tested by Aeromotive, with a full one-year warranty.

### '83-'82 Corvette Classic Update Wiring System

This

new kit is a complete wiring system specifically for the modified/pro-touring Corvette. It will handle upgrades like electric fans, aftermarket A/C, gauges, powertrain combos, etc. Like many of American Autowire's other Classic Update kits, this one includes new ignition/lighting/dimmer switches, as well as new tail lamp sockets and headlight bucket harnesses.

### White Lightning Magnum shifter

The T56 transmission is finding its way into more and more classic Bow Ties and one thing that

can make this using it much better is a proper shifter throw, location and feel. The White Lightning Magnum shifter from American Powertrain is a short throw unit that has a clockable shifter etub and adjustable spring bias to let you fine tune the position and feel. It features all billet construction, and offers over 60 shift positions.

### Direct Fit Brake and Clutch Pedal Arms

If you are looking to upgrade the pedals in your Tri-Five, then check out these babies from Lokar. These billet aluminum pedal arms are a direct replacement for the stock steel units and feature bronze pivot bushings for extended wear. Pedal pads are included and once installed will give the car a high-end appearance with zero custom fabrication.

**MT Street Comp**  
Mickey Thompson Performance Tires and Wheels is proud to introduce the new

Street Comp ultra-high performance tire. This newly developed tire utilizes Mickey Thompson's race tire technology in a street tire that's perfect for late model Camaro's and muscle cars with bigger diameter rims. The Street Comp has a UTQG 300, AA, A treadwear rating and a unique tread design for performance and responsive handling in both wet and dry conditions. The Street Comp is available for 17-, 18-, 19-, and 20-inch wheel diameters.

**6-Speed 4L80E Valve Body**  
The Powertrain Control Solutions six-speed 4L80E valve body enables

the 4L80E to operate as a five-speed or six-speed, and provides electronically controlled engine braking. The PCS engineers studied every inch of the stock 4L80E, until a design was reached that produced factory shift quality in every gear. While the engineers were studying the valve body, they also added a solenoid enabling electronically controlled engine braking, which greatly increases the performance and driving experience when using paddle shifters to downshift. The PCS valve body kit contains a 100-percent factory new valve body, solenoids, plates, gaskets, and internal harness.
